

Sustainability and quality policy

Presto offers a complete solution of safety products, services and training for protection against fire and accidents. Prestos vision "Saving lives together" aims to contribute step by step to a safer society by helping to protect our environment and supporting our customers in their prevention work.

We are committed to understanding our stakeholders' needs, through an open dialogue with customers, authorities and other stakeholders to monitor their requirements and ensure that we meet binding requirements. Together with our customers and partners, we are working towards a safer future for generations to come.

We attach great importance to high product and service quality, phasing out environmentally hazardous substances, strengthening our circular offering and offering products with a low climate footprint. We prioritize actions related to safety, quality and sustainability improvements of our internal processes and our offer and focus on smooth operations to ensure that it is always easy and convenient for our customers to be safe and choose sustainable solutions.

Our ambition is to conduct target-driven sustainability and quality work based on our leading position in the industry, global goals and applicable guidelines. We want to be the driving force and are not afraid to take the lead in our industry, drive development forward and be a role model.

Responsible decisions

In our sustainability work, we will act with responsibility and transparency, integrating sustainability considerations into our decision-making.

We will constantly work actively to reduce our negative footprint and increase our positive contribution. We will also work for a strong and shared corporate culture that lives by our values: Together, Customer Focus and Simplicity. Being an attractive employer is part of our sustainability work, and we also take social responsibility.

Overall focus areas and long-term goals

Be the industry's most sustainable option by:

- › A completely environmentally adapted product range and offering non-toxic fire protection.
- › Working towards a circular and sustainable manufacturing process, what we call "the green extinguisher factory".
- › Reduce our climate footprint in line with the Paris Agreement.
- › Have a world-class sales process with the customer's best interests at heart.
- › Offer a customer-oriented delivery with the industry's highest level of service and greatest customer benefit.
- › Continuously develop our internal processes, our productivity and our ability to deliver.
- › Ensure the right product quality and a stable and sustainable supply chain.
- › Ensure socially and ethically fair conditions in our own operations and with our suppliers.
- › Live our values and be an attractive employer.

We address these areas through clear guidelines, targets and KPI monitoring to ensure continuous development and improvement of our quality and sustainability management and performance.
